## Rehabilitation

**As the population life expectancy increases**, rehabilitation services are a necessary and growing service in healthcare. Providers who develop an in-house continuum of care with rehabilitation services for their senior and orthopedic population will find these services financially rewarding. The development and implementation of the new PPS payment system in 2002 provides rehabilitation providers with an opportunity for margin with Medicare patients.

FHA encompasses the full continuum of rehab services including acute inpatient rehabilitation, outpatient rehabilitation services, skilled / sub-acute rehabilitation and specialty rehabilitation programs.

FHA can help you increase satisfaction and improve outcomes while decreasing the costs of rehabilitation. We offer the following services:

- Development of new rehabilitation units
- CORF's, and outpatients services
- Certificate of Need Work
- Evaluation of financial and operations in existing units
- Physician and staff educational programs
- PPS performance evaluations
- Medical chart auditing
- Physician performance and evaluations
- Productivity
- CARF Preparation
- Tracking-systems development
- Inpatient and outpatient specialty program development.
- Marketing and loyalty brand services specific to the facility or service
- 75%-rule auditing and compliance review
